GLOBAL PRESENCE 18

WHO WE ARE

Toyo Packaging was established in 1989 and has emerged as one of the leading flexible packaging companies in Pakistan. We deal in conversion of flexible packaging material and we specialize in gravure printing, anti-counterfeiting holographic film and specialized stand-up pouches. Toyo Packaging serves clients from diverse backgrounds and industries including multinational FMCG's, tea, confectionary, cakes, snacks, ice creams, textiles, pharmaceuticals and automotive. With our more than 3 decades of experience in the industry, we not only serve well-established companies, but also support new setups and assist them with know-how of the packaging field. Our aim is to grow our business by strongly integrating with our customers.

Toyo Packaging is your strategic partner who you can trust to deliver and make your job easier by providing unique packaging solutions, which allow you to maximize your focus on your core business. We produce a wide range of custom designed laminate structures for the primary packaging of products in solid, powder or liquid form in consumer packaging as well as bulk packaging.

Our customization optimizes the design to achieve product protection and brand image promotion whilst keeping in consideration the clients' budget. Our R&D team is devoted to provide new packaging solutions that meet the latest packaging trends and customer requirements.

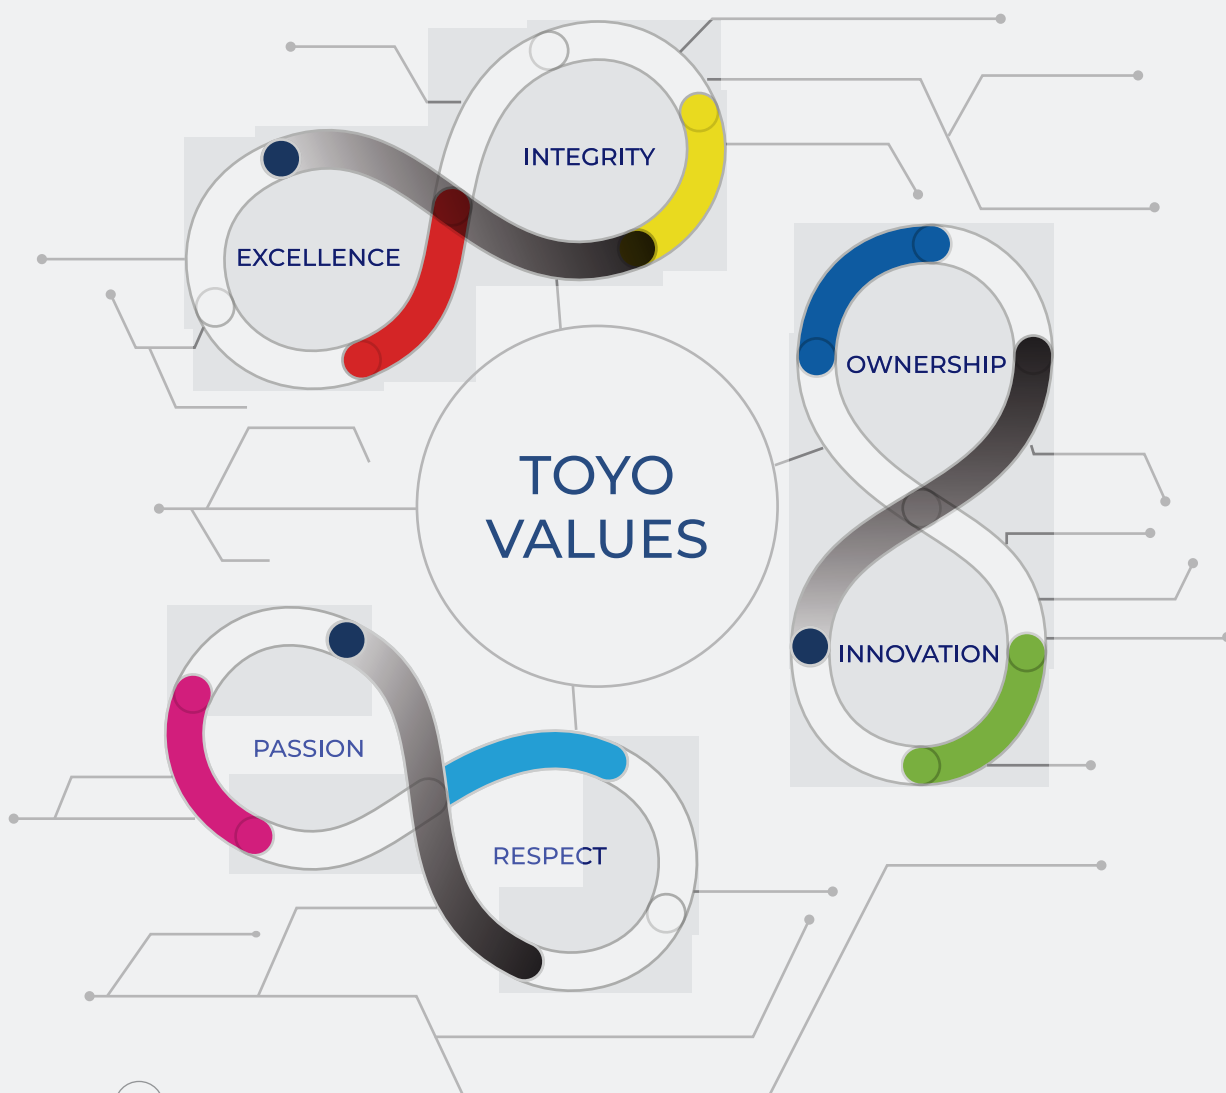

With decades of solid experience, we've built up a team of experts and state of the art equipment supported by a strong MIS system that enables Toyo Packaging to convert different types of substrates, including BOPET, Metallized-BOPET, Pearlized BOPP, Matt BOPP, BOPP, Metallized-BOPP, CPP, Metallized-CPP, BOPA (Nylon), ALU FOIL, CO-EX PE, into duplex and triplex laminates.

VISION & MISSION

Toyo Packaging aims to support its customers by providing latest flexible packaging trends and solutions.

We continuously emphasize on innovation and our R&D team is dedicated to bring new solutions to our customers. We ensure that we not only extend our support and services to established companies but also help and guide new and emerging set-ups.

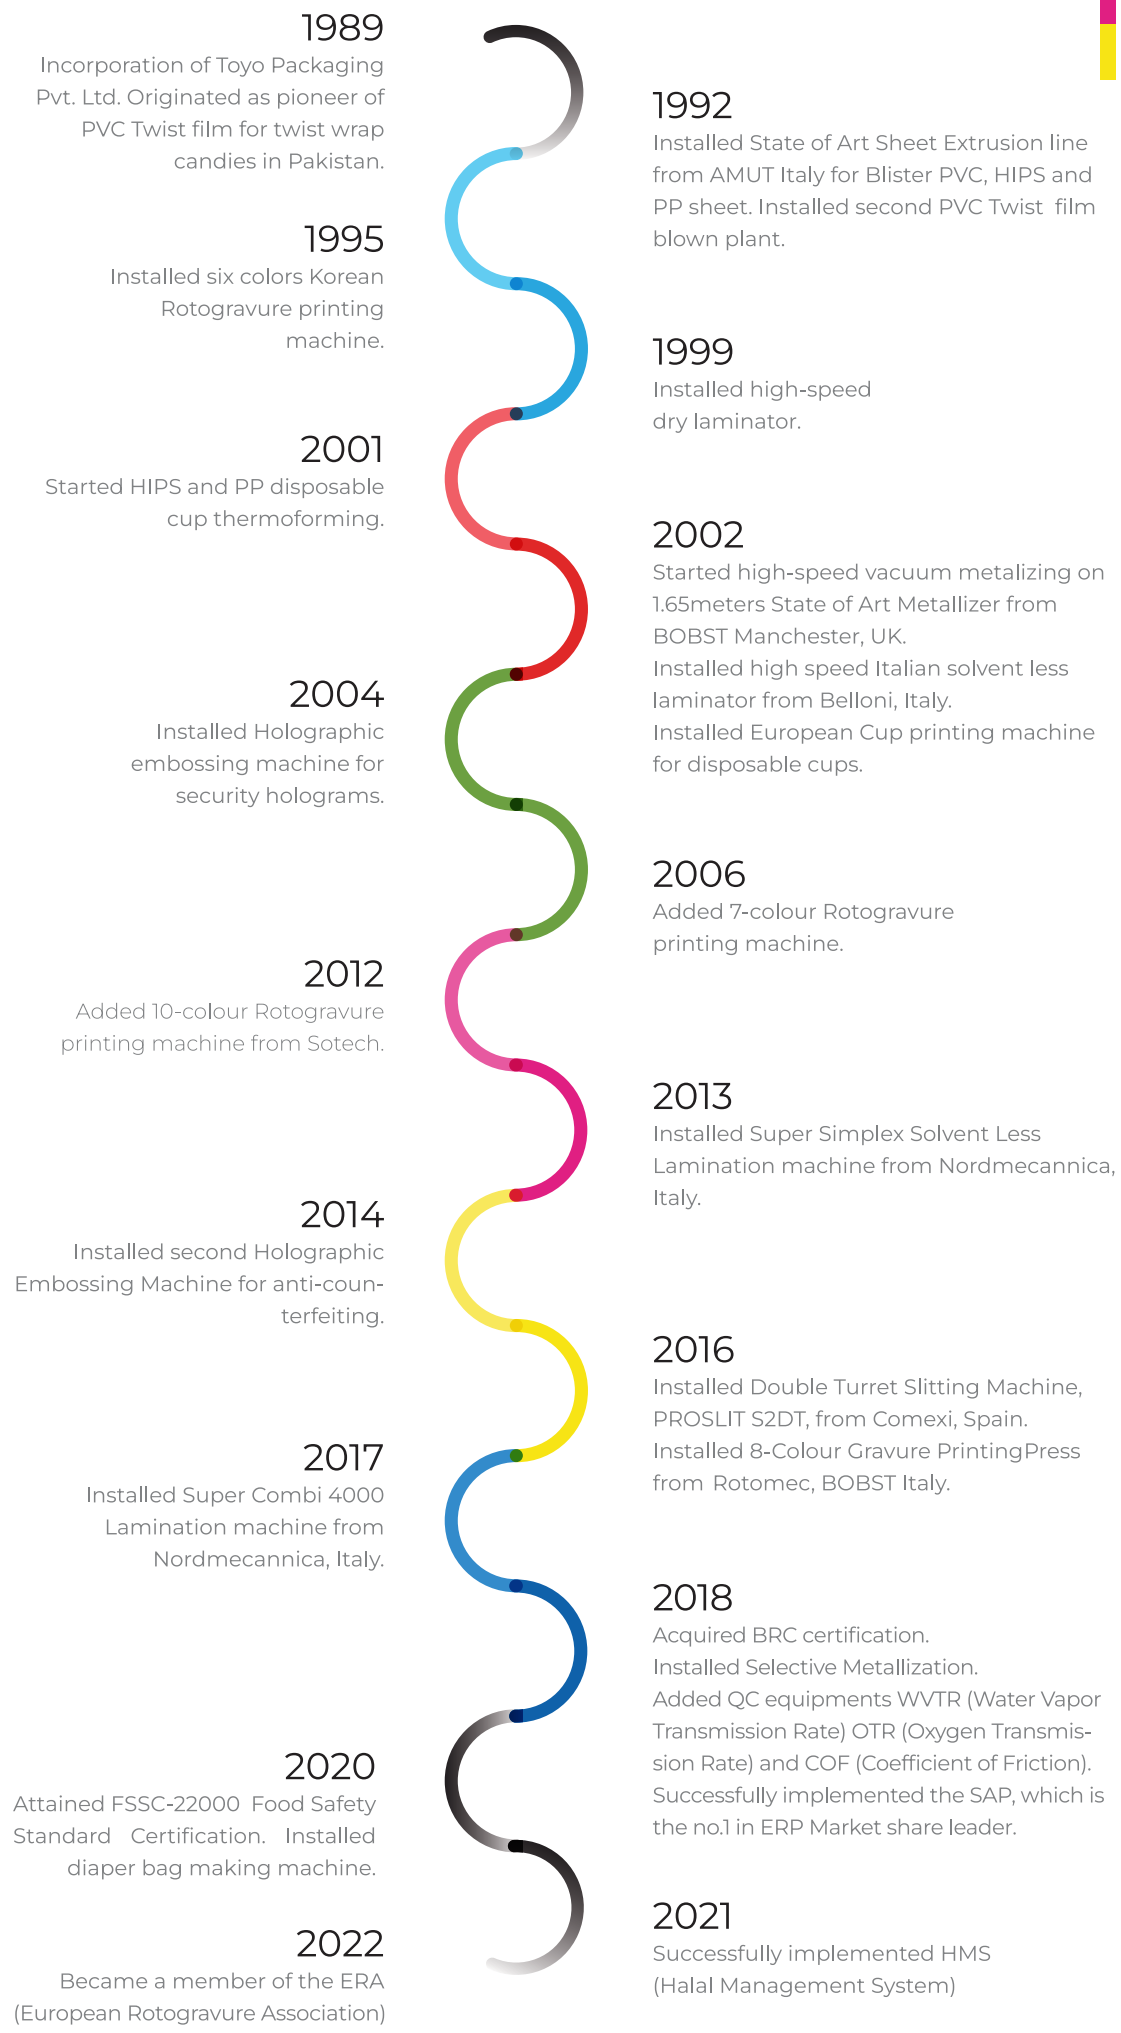

ATA GLANCE

Our founder, Mr. Maqbool Elahi, emerged as the industry leader by creating Toyo Packaging in 1989 when there was an insignificant concept of flexible packaging in Pakistan. Over the years we did not only invest in our machinery and equipment but also in our team in order to enhance our quality and service.

SUSTAINABILITY

Sustainability strategy is centered on a three-pronged approach that extends far beyond profit and encapsulates the people who we interact with and the planet that we live on. We ensure that all recyclable material is reused, and the waste disposal is carried out in the most environmentally viable way.

SERVICES

Consultation

With more than 3 decades of knowledge and experience in the packaging field, we extend our services by providing professional consultancy to our clients to cater their packaging requirements.

Packaging Design

We understand the importance of packaging and its ability to enhance product protection and product appeal. We have an in-house design team that enables custom designing of the product packaging according to customer requirements.

Packaging Material

We specialize in providing custom design packaging material to the industry for more than 3 decades. We provide packaging material for flexible packaging solutions and beyond to ensure we satisfy our customer needs.

Quality Assurance

We have firm belief in quality assurance and we assure our customers of our product quality. We have international quality standards and are ISO 9001: 2008 and ISO 22000: 2005 certified. We believe in continuous improvement and our team is working towards achieving BRC Global Standard for Packaging and Packaging Materials.

Technical Support

We are equipped with a well-qualified technical team that extends its support to our customers. This after-sales service enables strategic partnership between Toyo and its customers that aims to benefit both, the company and the client.

INDUSTRY

FOOD & BEVARAGES

Toyo Packaging has been serving the Food & Beverage industry for the past 3 decades. We provide a wide range of custom designed laminate structures for the primary packaging of food products in solid, powder or liquid form in consumer packaging, as well as, bulk packaging. We also provide labels for beverages that meet latest high- speed labeling machines' requirements. The sleek finishing of these labels leaves no margin for error and improves the overall packaging attributes of the product. Our R&D team is devoted to provide new packaging solutions that meet the latest packaging trends and customer requirements.

TEXTILES

Toyo Packaging has flexible packaging solutions for the Textile Industry. We specialize in providing anti-counterfeiting packaging solutions to promote innovation and enhancement of design attributes. Our aim is to provide our clients with the latest trends in flexible packaging suitable for this industry.

PERSONAL CARE

Toyo Packaging provides flexible packaging for the personal care industry. Our unique packaging solutions for this industry is best utilized to package personal care items to improve product protection, as well as, enhance design attributes. We provide primary and secondary packaging solutions for the industry.

PHARMACEUTICALS

Toyo Packaging specializes in high barrier structures for flexible packaging of pharmaceutical products. We also specialize in anti-counterfeiting boxes for medicines. Our team is committed to provide flexible packaging solutions for the pharmaceutical industry.

FROZEN PRODUCTS

Toyo Packaging provides flexible packaging solutions that meet the specifications required for frozen products. We specialize in providing packaging material for ice creams and paratha bags.

TECHNOLOGY & INNOVATION

Gravure Printing

We are equipped with two state of the art high- speed gravure printing machine. Our latest addition in the Gravure Machine is ROTOMECH 4001 that is 8-colour high-speed state-of-the-art machinery from BOBST that allows creativity in design without compromising on the printing quality. We are also equipped with 10-colour state-of-the-art machinery from SOTECH. The two gravure printing machines provide us immense flexibility to cater to our customer's requirements and eliminate limitation on the printing end with high precision printing results.

Solvent- less Lamination

Our state-of-the-art lamination machine from Nordmeccanica ensures highest quality of solvent-less lamination. The "Super Simplex" technology eliminates even the minute chances of lamination errors in duplex and triplex structures.

Application: Tea, Confectionary, Cakes, Biscuits, Snacks, Ice Creams, Textiles, Powdered Milk, Grains and Pulses.

Solvent- Based Lamination

At Toyo Packaging we also provide solvent- based lamination for high barrier specialized film structures. Our recent addition of 'Super Combi 4000' from Nordmeccanica, Italy meets highest quality of product specification requirements for the most complex flexible laminate structures. This Solvent- based Lamination is suitable for specialized laminate structures that require packaging for aggressive nature of the product and is used world wide to overcome limitations of the Solvent- less Lamination process.

Application: Ketchup & Sauces, Pickles, Pharmaceuticals, Instant Drinks, Powdered Milk, Flour, Rice, Grains, Pulses and Personal Care.

Bag Making

We are equipped with a bag -making machine that produces custom design bags as per requirement of the consumer. This facility can add handles, zippers and punch holes to the finished bags as per customer demand. We make several types of bags including three-side seal bags, Stand-up pouches, Centre-seal pouches, Side- seal Bags, Gusset Bags and Side- welding bags.

Slitting Machines

In 2016, we installed European Comexi Proslit state-of-the-art primary slitting machine. This high-speed, double turret slitting machine runs at the speed of 500m/min with precision cutting of the finished product. This machine is equipped with latest innovation in the slitting technology and is fully automated leaving no chances of human error. Apart from the primary slitting machine, we are equipped with auxiliary slitting machines that extend our flexibility to perform multiple slitting jobs at the same time ensuring timely deliveries and shortened lead-times.

Holographic Film

Toyo Packaging understands the importance of innovation and we support our customers to be innovative by protecting them from counterfeiting by providing our specialized anti-counterfeiting holographic film. The combination of metallization and holographic film produces a unique packaging material that ensures attractive designs with high barrier properties, as well as, a solution for anti-counterfeiting.

Metallization

We are equipped with an in-house metallization facility supplied by the Bobst Group. This facility allows us to work around custom designs and extend our ability to execute specialized printing jobs. We also specialize in band-spot metallization that is mainly used for unique design purpose. The process only has certain width on the film and a transparent band window in between.

QUALITY CONTROL

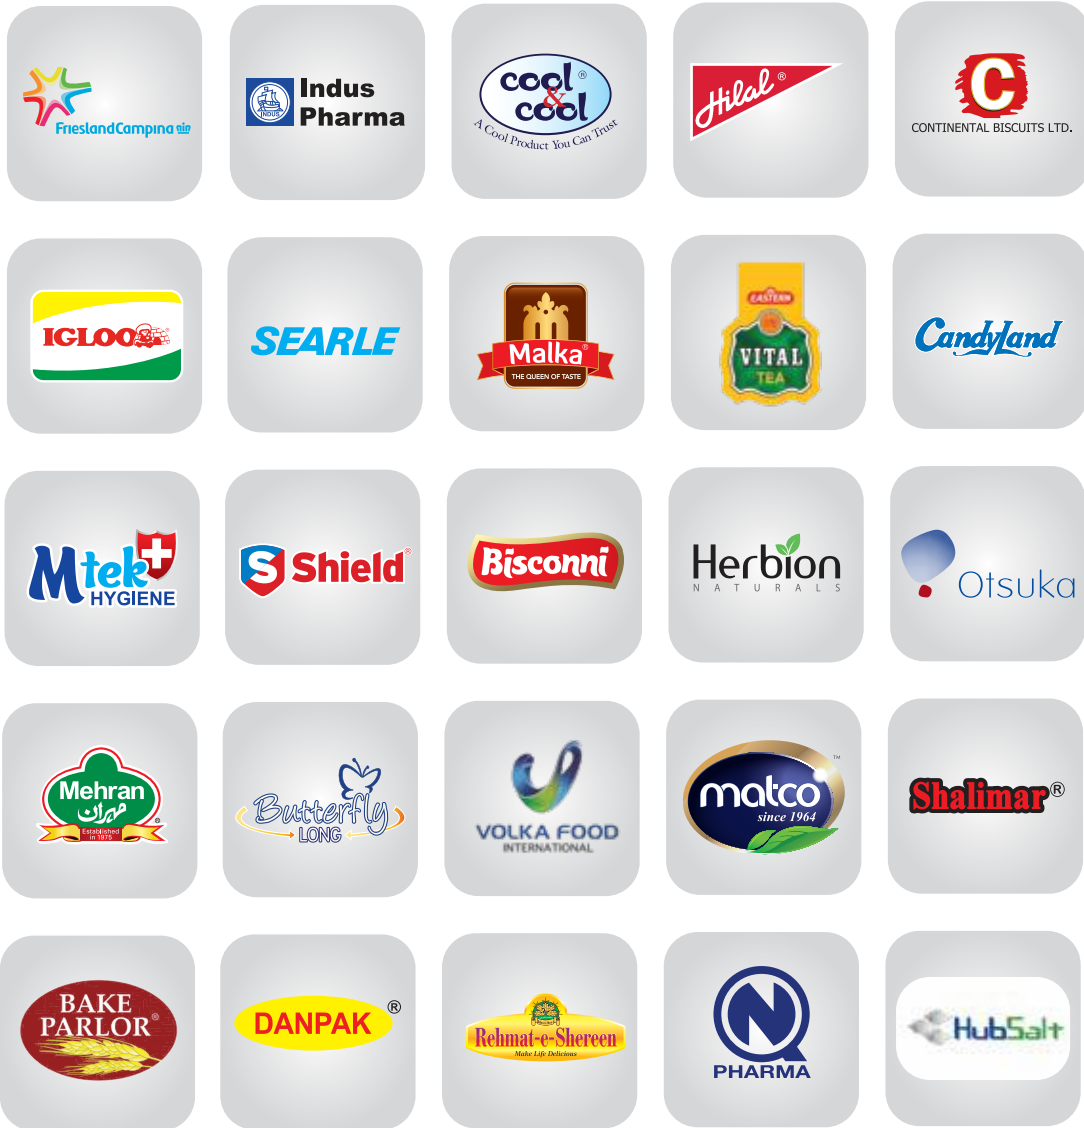

QUALITY POLICY/ CERTIFICATIONS

Toyo Packaging is committed to improving and providing the best quality products to its valuable customers at competitive rates. We are committed to achieving the highest degree of customer satisfaction by providing a product that is reliable and fulfills every requirement, and we have successfully achieved certification for ISO 9001: 2015 standard which is the very latest version of Quality Management System, alongside FSSC 22000 certification and ERA membership to ensure quality-driven results. It is

due to continual improvement and policy commitment that Toyo Packaging has also achieved one of the highest food safety benchmark certifications of BRC IoP (2118016). It has successfully driven marvelous achievements in upgrading Management Systems, enabling all production processes integrated with quality and food safety systems. We, at Toyo Packaging, enabled successful career pathway for our employees and participates in quality-oriented workshops locally and internationally.
